

AI Innovations

Enhancing Student Engagement & Learning

FlatWorld provides innovative, purpose-built AI tools designed to support student success while maintaining academic integrity. By focusing on gated, secure technology, we provide students with an ethical productivity tool that deepens their understanding of course material without compromising the value of learning.

SmartHelper

The Intelligent Study Assistant

SmartHelper is our AI study tool, fully integrated into the FlatWorld eReader and Homework system. Unlike open-ended AI tools, SmartHelper is “gated,” meaning it generates responses exclusively from the vetted content within your chosen textbook.

- Guided Learning, Not Answer Generation**
SmartHelper acts as a tutor, not an answer key. When a student asks a question about the text, the AI provides 2-3 paragraphs of relevant context and explanation. It does not bypass the learning process.
- Homework & Quiz Support**
If a student inputs a homework or quiz question, SmartHelper provides deep context on the underlying topic, helping the student understand the material so they can solve the problem themselves.
- Curated & Secure**
Because the information is pulled directly from the course materials, students are guided by authoritative, peer-reviewed content, ensuring accuracy and alignment with course curriculum.

AI Activities

New activities for a selection of textbooks that guide students through effectively using AI for their assignments — complete with grading rubrics.

AI-Generated Chapter Summary Podcasts

To meet diverse learning styles, FlatWorld provides AI-generated podcasts for every chapter.

- Engaging Content**
Each podcast is an approximately 7 to 12 minutes, “two-person” conversation that explores key examples, concepts, and case studies found in the chapter.
- Supplementary Learning**
These podcasts provide an additional layer of engagement, making complex topics more accessible and easier to digest on the go.
- Proprietary Technology**
Developed using our own proprietary software, these audio summaries offer a consistent and high-quality supplementary resource.

Why FlatWorld’s Approach to AI Matters

In an era where AI is rapidly changing the academic landscape, FlatWorld focuses on transparency and academic rigor. Our AI tools are built to integrate seamlessly into your existing course flow via your LMS, providing students with valuable support without needing extra logins or external platforms. We empower students to use AI as an ethical productivity tool that enhances, rather than replaces, their educational experience.
